DV timecode
SMPTE timecode

CONTROL PANASONIC DV CAMCORDERS AND VCRs FROM YOUR VIDEO OR AUDIO SYSTEM

Why PanPort™?

- Use your non-linear system's VTR control port to automate the digitizing of DV footage from compatible Panasonic units
- Panasonic DV camcorders & VCRs can now be controlled from standard RS-422 video or audio controllers
- LTC Export™ option converts DV timecode to SMPTE timecode for editing, logging and dubbing applications (optional)
- Control Panasonic DV devices while your audio workstation chases SMPTE timecode from the DV tape (optional)
- Portable, quick and easy with plug & play setup—take it along to any post production facility
- Panasonic DV control permits editing and logging with compatible Panasonic DV camcorders and VCRs

Who Uses PanPort™?

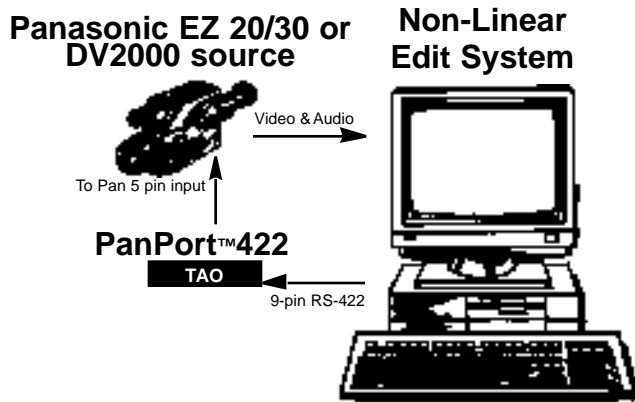

- Producers use PanPort™ for automated batch-capture from Panasonic camcorders or VCRs directly to disk—no dubbing
- Post production facilities use PanPort™ to provide direct control of their clients' low-cost camcorders and VCRs
- TV news facilities use PanPort™ to gain quick, first-generation control of consumer level breaking news footage
- Independent videographers use PanPort™ to interface low-cost consumer equipment with professional systems

EZ-20/30/50 and DV-2000 are trademarks of Panasonic Corporation. LANC and Control-L are trademarks of Sony Corporation.
