Compatible with control systems which implement standard Sony VTR (P2) commands.

INSTALLATION:

Requires installation by a qualified engineer.

RS-422 CONTROL FOR THE SONY BVW-22 VTR

VTR-Port422 Kit

Part# 9068

Why Use VTR-Port™?

- Provides control of the BVW-22 Betacam-SP VTR from computer-based or RS-422 controllers
- Provides a 9-in, RS-422 control connector on the rear panel of the BVW-22 VTR
- Allows you to log tapes from BVW-22 with computer-based or other RS-422 controllers
- Transmits drop-frame SMPTE timecode between deck and controller
- Saves money on expensive VTRs you won't have to buy

Who Uses VTR-Port™?

- TV networks use VTR-Port422 to maximize their investments in earlier model VTRs
- NBC, ABC and CBS (in NY, LA and DC) have modified their BVW-22 decks with VTR-Port422
- Independent producers use VTR-Port422 to save money by logging from the BVW-22
- Post production facilities use VTR-Port422 to computerize viewing systems for timecode logging

How Do I Use VTR-Port™?

- Have your engineer install the VTR-Port422 using our printed instructions.
- Once installed, a 9-pin RS-422 control port is available on the BVW-22 VTR's rear panel.
- Connect your VTR control cable to the the 9-pin port.
- Set your controller or non-linear system for control of a Betacam VTR (such as UVW-1800).
- Use your \$6,000 savings to take a nice vacation.

BVW-22 and Betacam are tradenames of Sony Corporation.
